---

## Professional Summary:

Front End Web Developer seeking to add value to a web-based company, provide modern solutions for impactful web applications, and push the envelope of user experience.

## Preferred skills:

React, JavaScript, Node.js, Parcel.js, SCSS, CSS, HTML, Express.js, MongoDB, Git

## Career Experience:

### Front-End Web Developer

#### Direct Wines - Norwalk, CT - February 2019 to May 2019

- Worked within a small team of developers and designers building wine product microsites and reusable components for partner sites.
- Improved site SEO with metadata and Structured data markup that allowed site search results to display reviews, featured links, and other custom data.
- Experimented and provided input on emerging web technologies such as Web Components, Vue, and React with Hooks for future code base.
- Improved check-out experience by fetching customer data from an API and rendering different components such as saved payment methods depending on the user state.

### Front-End Web Developer

#### Kathy Kuo - New York, NY - January 2018 to September 2018

- Rapidly prototyped new site features as the sole in-house developer and weighed UX/UI decisions daily with lead UX Director and Founder/CEO.
- Partook in weekly SCRUM meetings to strategize and schedule sprint goals.
- Responsible for implementation of main homepage redesign including dynamic product sliders.
- Built sister site from the ground up: <https://kathykuohome.com/designbar>.
- Optimized existing front end code and fixed script errors, resulting in a 60 point increase in Google PSI score and a 3 second reduction in average page load speed.
- Helped implement Google Analytics and Google Optimize A/B tests with Marketing Lead.

### Front-End Web Developer

#### Archi FX LLC - Remote - August 2017 to January 2018

- Consulted remotely with web development firm Archi FX on a number of front-end web projects and Apache web server maintenance tasks.

- Coded design-intensive UI components and responsive layouts from the scratch using SCSS and flexbox.
- Drastically reduced web server memory usage by automating the minification of code and compression of assets such as large images with Node.js.

#### **Front-End Web Developer**

##### **Healthcasts - New York, NY - December 2016 to July 2017**

- Worked within a varied group of web technologists, marketing professionals, and physicians to create digital content in an Agile environment.
- Followed in strict accordance to company design and brand guide to ensure the delivery of several product microsites containing sensitive medical diagnostic information.
- Teamed with Creative Director on a new informational product page featuring heavy user interactivity and CSS transitions/animations.
- Created a custom Node.js/NPM build tool chain for teammates to use.

#### **Front-End Web Developer**

##### **Finalsite - Glastonbury, CT - 2014 to November 2016**

- Collaborated with a large team of developers, designers, project managers, and clients in a fast-paced Agile environment.
- Worked successfully from conceptions to deployment on over 30 custom designed, mobile-friendly, and responsive school websites.
- Learned Gulp.js as a build tool to leverage SASS and optimize web assets.
- Structured UI components in a clear way for clients to make content updates through the company's proprietary CMS.
- Tested sites across all browsers and devices, fixing any script or display errors.

#### **Education:**

University of Connecticut (2010-2014)

Bachelor of Science in Computer Science
